Hardware recommendation for a student computer

You do not need to have a computer that meets the recommended specifications before starting your studies. You can begin with a computer that may not fully meet the recommended requirements. Please note that these are approximate device recommendations. It is advisable to have a computer that meets the approximate device recommendations by the spring semester. Note: If you are studying in the field of gaming or technology, you can contact your own subject teacher regarding device recommendations. They can provide you with the latest recommendations related to different software or other specific needs.

General equipment recommendation for different fields of education (International Business, Sports and Leisure Management, Esports Business, Tourism)

Laptop
At least 8 GB of main memory, preferably more.
At least Windows 10 operating system, preferably Windows 11. Other supported operating systems in basic use MacOS and Linux. Note: the compatibility of MacOS and Linux operating systems with all the software's used in studies cannot be guaranteed.
A processor at least Intel i5 or similar, also AMD will work
5GHz WLAN
The size of the screen to your liking
It is recommended to extend the warranty period (normally 1 year, ask for the possibility for a longer period)
Hard Disk / Mass Storage: at least 128 GB SSD, preferably larger is recommended
A good battery that lasts for several hours of continuous use
Camera, headphones and microphone
Options for connectivity to the KAMK AV presentation technology:
- HDMI connection
- USB-C connection
